The Prospectus is made available to the public at the Casablanca Stock Exchange Headquarters and on its website www.casablanca-bourse.com. It is also available on the AMMC website www.ammc.ma.

I. PRESENTATION OF THE OPERATION

I.1. Objectives of the operation

Through this program, Crédit Agricole du Maroc aims to meet the challenges of its Strategic Development Plan while renewing its commitment within the framework of its public service mission. The program aims to achieve the following objectives:

- ✔ Financing and support for the Agro-Industrial sector under its 2017-2021 program contract signed with the State;
- ✔ Strengthening its regulatory capital and therefore improving its prudential ratios (solvency and liquidity) ;

I.2. Structure of the offer

The subordinated bond issuance, purpose of this excerpt, is about a maximum amount of one billion (500,000,000) dirhams. It will be issued in eight (8) tranches:

- **A tranche A** at an annually adjustable interest rate and listed on the Casablanca Stock Exchange. This tranche will be reimbursable *in fine* over a period of 7 years and will amount to a maximum of 500,000,000 MAD with a nominal value of 100,000 MAD per subordinated bond ;
- **A tranche B** at a fixed interest rate and listed on the Casablanca Stock Exchange. This tranche will be reimbursable *in fine* over a period of 7 years and will amount to a maximum of 500,000,000 MAD with a nominal value of 100,000 MAD per subordinated bond ;
- **A tranche C** at an annually adjustable interest rate and tradable over-the-counter (non-listed). This tranche will be reimbursable *in fine* over a period of 7 years and will amount to a maximum of 500,000,000 MAD with a nominal value of 100,000 MAD per subordinated bond ;
- **A tranche D** at a fixed interest rate and tradable over-the-counter (non-listed). This tranche will be reimbursable *in fine* over a period of 7 years and will amount to a maximum of 500,000,000 MAD with a nominal value of 100,000 MAD per subordinated bond ;
- **A tranche E** at an annually adjustable interest rate and listed on the Casablanca Stock Exchange. This tranche will be reimbursable *in fine* over a period of 10 years and will amount to a maximum of 500,000,000 MAD with a nominal value of 100,000 MAD per subordinated bond ;
- **A tranche F** at a fixed interest rate and listed on the Casablanca Stock Exchange. This tranche will be reimbursable *in fine* over a period of 10 years and will amount to a maximum of 500,000,000 MAD with a nominal value of 100,000 MAD per subordinated bond ;
- **A tranche G** at an annually adjustable interest rate and tradable over-the-counter (non-listed). This tranche will be reimbursable *in fine* over a period of 10 years and will amount to a maximum of 500,000,000 MAD with a nominal value of 100,000 MAD per subordinated bond ;
- **A tranche H** at a fixed interest rate and tradable over-the-counter (non-listed). This tranche will be reimbursable *in fine* over a period of 10 years and will amount to a maximum amount of 500,000,000 MAD with a nominal value of 100,000 MAD per subordinated bond ;

The total amount allocated to these above-mentioned eight tranches may not exceed, in any case, the amount of 500,000,000 MAD.

The current issue is reserved for qualified investors under the Moroccan law as stated in the prospectus.

The restriction of the subscription to qualified Moroccan investors is to facilitate the management of the subscriptions on the primary market. It is understood that every investor willing to acquire these bonds will be able to do so on the secondary market.

I.3. Information regarding the securities to be issued

Disclaimer

Subordinated bonds differ from traditional bonds by reason of the contractually defined ranking of claims set forth in the subordination clause. The effect of the subordination clause is to make the repayment of the subordinated bond conditional on the repayment of all outstanding privileged or unsecured debts in the event of the issuer going into liquidation.

Tranche A : Subordinated bonds reimbursable in fine over a period of 7 years listed on the Casablanca Stock Exchange with an annually adjustable interest rate

Nature of the securities	Subordinated bonds listed on the Casablanca Stock Exchange, dematerialized by registration with the central securities depository (Maroclear) and registered in accounts with accredited affiliates.
Legal Form	Subordinated bonds in bearer form
Maximum amount of the tranche	500,000,000 Dhs.
Maximum number of securities to be issued	5,000 subordinated bonds.
Nominal unit value	100,000 Dhs.
Maturity	7 years.
Subscription period	From 22 to 24 October 2018 included
Vesting date	November 01, 2018
Maturity date	November 01, 2025
Issue price	At par, i.e 100.000 Dhs.
Risk premium	70 bps.
Nominal interest rate	<p><u>Annually adjustable.</u></p> <p>For the first year, the nominal interest rate is the full 52 week rate (money base) rate determined in reference to the treasury bond secondary yield curve as published by Bank Al Maghrib on October 18, 2018, increased by a risk premium 70 bps. The interest rate will be published in a journal of legal announcements on October 19, 2018.</p> <p>Beyond the first year, the reference rate will be the full 52 week (monetary base) rate determined in reference to the treasury bond secondary yield curve as published by Bank Al Maghrib 5 trading days prior to the anniversary date of the coupon. The reference rate thus obtained will be increased by a risk premium of 70 bps will be communicated by CAM to the Casablanca Stock Exchange 5 trading days before the anniversary date and will be published in a legal newspaper AT the same timeframe.</p>
Calculation method	<p>In case the reference rate is not observed directly on the curve of the secondary market benchmark, the determination will be made by the method of linear interpolation using the two points limiting the full 52 weeks maturity. (Monetary base).</p> <p>This linear interpolation will be done after the conversion of the next higher 52 weeks maturity actuarial rate in equivalent monetary rates.</p> <p>The calculation formula is: $(((\text{Actuarial rate} + 1) ^ (k / \text{exact number of days} *)) - 1) \times 360 / k;$ where k: maturity of the actuarial rate immediately greater than 52 weeks. * Exact number of days: 365 or 366 days.</p>
Interest	Interest will be paid annually on the anniversary of the security's vesting date November 01 of each year. Payment shall be effected that very day or on the first working day thereafter if that day is not a working day.

	<p>The interest on subordinated bonds shall cease to run from the date on which the capital is credited to Crédit Agricole du Maroc. No deferral of interest will be possible in this transaction.</p> <p>Due to annually interest rate adjustment, interests will be calculated on a monetary basis i.e: [nominal unit value x nominal interest rate x (exact number of days / 360 days)].</p>
Allocation method	<p>Allocation in proportion to demand with a priority given to tranches F and H (maturity 10 years with fixed rate), then to tranches B and D (maturity 7 years with fixed rate), then to the tranches E and G (maturity 10 years with annually adjustable rate) and finally to tranches A and C (maturity 7 years with annually adjustable rate).</p>
Repayment of principal	<p>The CAM subordinated bonds issue will be subject to an in fine repayment of the principal. In the event of merger, demerger or partial contribution of CAM assets during the life of the securities entailing the transmission of all assets and liabilities to a separate legal entity, all rights and obligations in respect of the subordinated bonds will be automatically transferred to the legal entity assuming CAM rights and obligations.</p> <p>In the event of CAM going into liquidation, repayment of the principal will be subordinated to all other debts.</p>
Early repayment	<p>CAM shall refrain, during the whole Term of the loan, from the early amortization of the subordinated bonds.</p> <p>CAM nevertheless, reserves the right, with the prior agreement of Bank Al Maghrib, to buy back the subordinated bonds on the secondary market, provided that the legal and regulatory provisions so allow, such repurchases being without consequence for bondholders wishing to keep their securities until normal maturity, and without affecting the schedule for normal amortization. Subordinated bonds so repurchased will be cancelled with the prior approval of Bank Al-Maghrib.</p> <p>In case of cancellation, the issuer must inform the Casablanca Stock Exchange of canceled bonds.</p>
Assimilation	<p>The subordinated bonds of Tranche A are not subject to any assimilation.</p>
Rank/subordination	<p>The capital and the interests are subject to a subordination clause.</p> <p>The application of this clause does, in no way, violate the legal norms regarding the accounting principles of losses allocation, the shareholders' obligations and the subscribers rights to get, in compliance with the contractually determined terms, the payment of their capital and interest on securities.</p> <p>In the event of the liquidation of CAM, the subordinated securities of the present issuance will be reimbursed on capital at a price equal to the par. Their reimbursement shall only occur after payment of all privileged or unsecured creditors . These subordinated bonds will have the same ranking at reimbursement as the other subordinated loans, which have been or might be issued subsequently by CAM in Morocco or abroad, in proportion of their amount, if applicable.</p>
Maintaining ranking	<p>CAM undertakes, until effective reimbursement of all the subordinated bonds of this present issuance, not to institute on any other subordinated securities, which it may issue subsequently, any priority in terms of reimbursement ranking in case of litigation, without consenting the same rights to the subordinated bonds of this issuance.</p>
Repayment guarantee	<p>This issuance is not subject to any particular guarantee.</p>
Rating	<p>This issuance has not been subject to any rating request.</p>
Tradability	<p>The subordinated bonds of tranche A are freely negotiable at the Casablanca Stock Exchange. There is no restriction imposed by the issuance conditions to the free tradability of the bonds of tranche A.</p>
Securities listing	<p>The subordinated bonds of the tranche A will be listed on the Casablanca Stock exchange and will thus be object of a request for admission to the bonds compartment of the Casablanca Stock Exchange. Their listing date is foreseen to be on 29 October 2018 on the bonds compartment, under the ticker OCAMC.</p> <p>To be listed on the Casablanca Stock Exchange, the total amounts allotted to the tranches A, B, E and F must be higher or equal to 20,000,000 MAD. If after the closure of the subscription period, the amount allotted to tranches A, B, E and F is lower than 20,000,000</p>

	MAD, the subscriptions relating to these tranches will be cancelled.
Company responsible of the registration	The company responsible of the registration is MSIN
Procedure of first listing	The listing of tranche A will be performed by a direct listing in accordance with articles 1.2.6 and 1.2.22 of the General Regulation of the Casablanca Stock Ex-change.
Bondholders representation	In accordance with article 299 § 1 and article 300 § 1 and 2 of law n°17-95, the Board of Directors decides - subject to the Supervisory Board's approval - to appoint Mr Mohamed HDID as temporary representative of the mass of bondholders. Being specified that the provisory agent appointed is identical for tranches A to H of the given issue, which are gathered in one single pool. This decision takes effect starting from the opening of the subscription period. The Board of Directors undertakes to proceed to the convening of the Bondholders' General Assembly to nominate the permanent representative of the bondholders within a year of the opening of the subscription period.
Applicable law	Moroccan law
Competent Court	Commercial Court of Rabat

Tranche B : Subordinated bonds reimbursable in fine over a period of 7 years listed on the Casablanca Stock Exchange with fixed interest rate

Vesting date	November 01, 2018
Maturity date	November 01, 2025
Issue price	At par, i.e 100.000 Dhs.
Risk premium	70 bps
Nominal interest rate	<p>Fixed interest rate referring to the 7 years T-Bond interest rate, observed or calculated following the linear interpolation method on the basis of the secondary yield curve reference rate as published on October 18, 2018, by Bank Al Maghrib. This rate is increased by a risk premium of 70 bps.</p> <p>The determination is made by the method of linear interpolation using the two points limiting the full 7 year maturity (actuarial basis).</p> <p>The nominal interest rate will be published no later than October 19, 2018 by CAM in a journal of legal announcements.</p>
Interest	<p>Interest will be paid annually on the anniversary date of the security's vesting day November 01 each year. Payment shall be effected that very day or on the first working day thereafter if that day is not a working day.</p> <p>The interest on subordinated bonds shall cease to run from the date on which the capital is credited to Crédit Agricole du Maroc. No deferral of interest will be possible in this transaction.</p> <p>Interest will be calculated using the following formula [nominal unit value x nominal interest rate]</p>
Allocation method	Allocation in proportion to demand with a priority given to tranches F and H (maturity 10 years with fixed rate), then to tranches B and D (maturity 7 years with fixed rate), then to the tranches E and G (maturity 10 years with annually adjustable rate) and finally to tranches A and C (maturity 7 years with annually adjustable rate).
Repayment of principal	<p>CAM subordinated bonds issue will be subject to an in fine repayment of the principal.</p> <p>In the event of merger, demerger or partial contribution of CAM assets during the life of the securities entailing the transmission of all assets and liabilities to a separate legal entity, all rights and obligations in respect of the subordinated bonds will be automatically transferred to the legal entity assuming CAM rights and obligations.</p> <p>In the event of CAM going into liquidation, repayment of the principal will be subordinated to all other debts.</p>
Early repayment	<p>CAM shall refrain, during the whole Term of the loan, from the early amortization of the subordinated bonds.</p> <p>CAM nevertheless, reserves the right, with the prior agreement of Bank Al Maghrib, to buy back the subordinated bonds on the secondary market, provided that the legal and regulatory provisions so allow, such repurchases being without consequence for bondholders wishing to keep their securities until normal maturity, and without affecting the schedule for normal amortization. Subordinated bonds so</p>

	repurchased will be cancelled with the prior approval of Bank Al-Maghrib. In case of cancellation, the issuer must inform the Casablanca Stock Exchange of canceled bonds.
Assimilation	The subordinated bonds of Tranche B are not subject to any assimilation.
Rank/subordination	<p>The capital and the interests are subject to a subordination clause. The application of this clause does, in no way, violate the legal norms regarding the accounting principles of losses allocation, the shareholders' obligations and the subscribers rights to get, in compliance with the contractually determined terms, the payment of their capital and interest on securities.</p> <p>In the event of the liquidation of CAM, the subordinated securities of the present issuance will be reimbursed on capital at a price equal to the par. Their reimbursement shall only occur after payment of all privileged or unsecured creditors . These subordinated bonds will have the same ranking at reimbursement as the other subordinated loans, which have been or might be issued subsequently by CAM in Morocco or abroad, in proportion of their amount, if applicable.</p>
Maintaining ranking	CAM undertakes, until effective reimbursement of all the subordinated bonds of this present issuance, not to institute on any other subordinated securities, which it may issue subsequently, any priority in terms of reimbursement ranking in case of litigation, without consenting the same rights to the subordinated bonds of this issuance.
Repayment guarantee	This issuance is not subject to any particular guarantee.
Rating	This issuance has not been subject to any rating request.
Tradability	<p>The subordinated bonds of tranche B are freely negotiable at the Casablanca Stock Exchange.</p> <p>There is no restriction imposed by the issuance conditions to the free tradability of the bonds of tranche B.</p>
Securities listing	<p>The subordinated bonds of the tranche B will be listed on the Casablanca Stock exchange and will thus be object of a request for admission to the bonds compartment of the Casablanca Stock Exchange. Their listing date is foreseen to be on 29 October 2018 on the bonds compartment, under the ticker OCAME.</p> <p>To be listed on the Casablanca Stock Exchange, the total amounts allotted to the tranches A, B, E and F must be higher or equal to 20,000,000 MAD. If after the closure of the subscription period, the amount allotted to tranches A, B, E and F is lower than 20,000,000 MAD, the subscriptions relating to these tranches will be cancelled.</p>
Company responsible of the registration	The company responsible of the registration is MSIN
Procedure of first listing	The listing of tranche B will be performed by a direct listing in accordance with articles 1.2.6 and 1.2.22 of the General Regulation of the Casablanca Stock Ex-change.
Bondholders representation	In accordance with article 299 § 1 and article 300 § 1 and 2 of law n°17-95, the Board of Directors decides - subject to the Supervisory Board's approval - to appoint Mr Mohamed HDID as temporary representative of the mass of bondholders. Being specified that the provisory agent appointed is identical for tranches A to H of the given issue, which are gathered in one single pool. This decision takes effect starting from the opening of the subscription period. The Board of Directors undertakes to proceed to the convening of the Bondholders' General Assembly to nominate the permanent representative of the bondholders within a year of the opening of the subscription period.
Applicable law	Moroccan law
Competent Court	Commercial Court of Rabat

Tranche C : Unlisted Subordinated bonds reimbursable in fine over a period of 7 years with an annually adjustable interest rate

Nature of securities	Subordinated bond tradable over the counter (unlisted), dematerialized by registration with the central securities depository (Maroclear) and registered in accounts with accredited affiliates.
Legal form	Subordinated bonds in bearer form.
Maximum amount of the tranche	1,000,000,000 Dhs.
Maximum number of securities to be issued	5,000 subordinated bonds.
Nominal unit value	100,000 Dhs.
Maturity	7 years.
Subscription period	From 22 to 24 October 2018 included
Vesting date	November 01, 2018
Maturity date	November 01, 2025
Issue price	At par, i.e 100.000 Dhs.
Risk premium	70 bps
Nominal interest rate	<p><u>Annually adjustable.</u> For the first year, the nominal interest rate is the full 52 week rate (money base) rate determined in reference to the treasury bond secondary yield curve as published by Bank Al Maghrib on October 18, 2018. This rate is increased by a risk premium of 70 bps. The interest rate will be published in a journal of legal announcements on October 19, 2018. Beyond the first year, the reference rate will be the full 52 week (monetary base) rate determined in reference to the treasury bond secondary yield curve as published by Bank Al Maghrib 5 trading days prior to the anniversary date of the coupon. The reference rate thus obtained will be increased by a risk premium of 70 bps will be published by CAM in a legal newspaper at the same timeframe.</p>
Calculation method	<p>In case the reference rate is not observed directly on the curve of the secondary market benchmark, the determination will be made by the method of linear interpolation using the two points limiting the full 52 weeks maturity. (Monetary base). This linear interpolation will be done after the conversion of the next higher 52 weeks maturity actuarial rate in equivalent monetary rates. The calculation formula is: $(((\text{Actuarial rate} + 1) ^ {k / \text{exact number of days} *}) - 1) \times 360 / k;$ where k: maturity of the actuarial rate immediately greater than 52 weeks. * Exact number of days: 365 or 366 days.</p>
Interest	<p>Interest will be paid annually on the anniversary of the security's vesting date November 01 of each year. Payment shall be effected that very day or on the first working day thereafter if that day is not a working day. Due to annually interest rate adjustment, interests will be calculated on a monetary basis i.e: $[\text{nominal unit value} \times \text{nominal interest rate} \times (\text{exact number of days} / 360 \text{ days})].$</p>
Allocation method	Allocation in proportion to demand with a priority given to tranches F and H (maturity 10 years with fixed rate), then to tranches B and D (maturity 7 years with fixed rate), then to the tranches E and G (maturity 10 years with annually adjustable rate) and finally to tranches A and C (maturity 7 years with annually adjustable rate).
Repayment of principal	CAM subordinated bonds issue will be subject to an in fine repayment of the principal. In the event of merger, demerger or partial contribution of CAM assets during the life of the securities entailing the transmission of all assets and liabilities to a separate legal entity, all rights and obligations in respect of the subordinated bonds will be

	<p>automatically transferred to the legal entity assuming CAM rights and obligations. In the event of CAM going into liquidation, repayment of the principal will be subordinated to all other debts.</p>
Early repayment	<p>CAM shall refrain, during the whole Term of the loan, from the early amortization of the subordinated bonds.</p> <p>CAM nevertheless, reserves the right, with the prior agreement of Bank Al Maghrib, to buy back the subordinated bonds on the secondary market, provided that the legal and regulatory provisions so allow, such repurchases being without consequence for bondholders wishing to keep their securities until normal maturity, and without affecting the schedule for normal amortization. Subordinated bonds so repurchased will be cancelled with the prior approval of Bank Al-Maghrib.</p>
Assimilation	<p>The subordinated bonds of Tranche C are not subject to any assimilation.</p>
Rank/subordination	<p>The capital and the interests are subject to a subordination clause. The application of this clause does, in no way, violate the legal norms regarding the accounting principles of losses allocation, the shareholders' obligations and the subscribers rights to get, in compliance with the contractually determined terms, the payment of their capital and interest on securities.</p> <p>In the event of the liquidation of CAM, the subordinated securities of the present issuance will be reimbursed on capital at a price equal to the par. Their reimbursement shall only occur after payment of all privileged or unsecured creditors . These subordinated bonds will have the same ranking at reimbursement as the other subordinated loans, which have been or might be issued subsequently by CAM in Morocco or abroad, in proportion of their amount, if applicable.</p>
Maintaining ranking	<p>CAM undertakes, until effective reimbursement of all the subordinated bonds of this present issuance, not to institute on any other subordinated securities, which it may issue subsequently, any priority in terms of reimbursement ranking in case of litigation, without consenting the same rights to the subordinated bonds of this issuance.</p>
Repayment guarantee	<p>This issuance is not subject to any particular guarantee.</p>
Rating	<p>This issuance has not been subject to any rating request.</p>
Tradability	<p>Subordinated bonds of tranche C will be traded over the counter. There is no restriction imposed by the issuance conditions to the free tradability of the bonds of tranche C.</p>
Bondholders representation	<p>In accordance with article 299 § 1 and article 300 § 1 and 2 of law n°17-95, the Board of Directors decides - subject to the Supervisory Board's approval - to appoint Mr Mohamed HDID as temporary representative of the mass of bondholders. Being specified that the provisory agent appointed is identical for tranches A to H of the given issue, which are gathered in one single pool. This decision takes effect starting from the opening of the subscription period. The Board of Directors undertakes to proceed to the convening of the Bondholders' General Assembly to nominate the permanent representative of the bondholders within a year of the opening of the subscription period.</p>
Applicable law	<p>Moroccan law</p>
Competent Court	<p>Commercial Court of Rabat</p>

Tranche D : Unlisted Subordinated bonds reimbursable in fine over a period of 7 years with a fixed interest rate

Nature of the securities	Subordinated bonds unlisted, dematerialized by registration with the central securities depository (Maroclear) and registered in accounts with accredited affiliates.
Legal Form	Subordinated bonds in bearer form
Maximum amount of the tranche	500,000,000 Dhs.
Maximum number of securities to be issued	5,000 subordinated bonds.
Nominal unit value	100,000 Dhs.
Maturity	7 years.
Subscription period	From 22 to 24 October 2018 included
Vesting date	November 01, 2018
Maturity date	November 01, 2025
Issue price	At par, i.e 100.000 Dhs.
Risk premium	70 bps
Nominal interest rate	<p>Fixed interest rate referring to the 7 years T-Bond interest rate, observed or calculated following the linear interpolation method on the basis of the secondary yield curve reference rate as published on October 18, 2018, by Bank Al Maghrib. This rate is increased by a risk premium of 70 bps. The determination is made by the method of linear interpolation using the two points limiting the full 7 years maturity (actuarial basis). The nominal interest rate will be published no later than October 19, 2018 by CAM in a journal of legal announcements.</p>
Interest	<p>Interest will be paid annually on the anniversary date of the security's vesting day, November 01 each year. Payment shall be effected that very day or on the first working day thereafter if that day is not a working day.</p> <p>The interest on subordinated bonds shall cease to run from the date on which the capital is credited to Crédit Agricole du Maroc. No deferral of interest will be possible in this transaction. Interest will be calculated using the following formula [nominal unit value x nominal interest rate]</p>
Allocation method	Allocation in proportion to demand with a priority given to tranches F and H (maturity 10 years with fixed rate), then to tranches B and D (maturity 7 years with fixed rate), then to the tranches E and G (maturity 10 years with annually adjustable rate) and finally to tranches A and C (maturity 7 years with annually adjustable rate).
Repayment of principal	<p>CAM subordinated bonds issue will be subject to an in fine repayment of the principal. In the event of merger, demerger or partial contribution of CAM assets during the life of the securities entailing the transmission of all assets and liabilities to a separate legal entity, all rights and obligations in respect of the subordinated bonds will be automatically transferred to the legal entity assuming CAM rights and obligations. In the event of CAM going into liquidation, repayment of the principal will be subordinated to all other debts.</p>
Early repayment	<p>CAM shall refrain, during the whole Term of the loan, from the early amortization of the subordinated bonds.</p> <p>CAM nevertheless, reserves the right, with the prior agreement of Bank Al Maghrib, to buy back the subordinated bonds on the secondary market, provided that the legal and regulatory provisions so allow, such repurchases being without consequence for bondholders wishing to keep their securities until normal maturity, and without affecting the schedule for normal amortization. Subordinated bonds so repurchased will be cancelled with the prior approval of Bank Al-Maghrib.</p>

Assimilation	The subordinated bonds of Tranche D are not subject to any assimilation.
Rank/subordination	<p>The capital and the interests are subject to a subordination clause.</p> <p>The application of this clause does, in no way, violate the legal norms regarding the accounting principles of losses allocation, the shareholders' obligations and the subscribers rights to get, in compliance with the contractually determined terms, the payment of their capital and interest on securities.</p> <p>In the event of the liquidation of CAM, the subordinated securities of the present issuance will be reimbursed on capital at a price equal to the par. Their reimbursement shall only occur after payment of all privileged or unsecured creditors . These subordinated bonds will have the same ranking at reimbursement as the other subordinated loans, which have been or might be issued subsequently by CAM in Morocco or abroad, in proportion of their amount, if applicable.</p>
Maintaining ranking	CAM undertakes, until effective reimbursement of all the subordinated bonds of this present issuance, not to institute on any other subordinated securities, which it may issue subsequently, any priority in terms of reimbursement ranking in case of litigation, without consenting the same rights to the subordinated bonds of this issuance.
Repayment guarantee	This issuance is not subject to any particular guarantee.
Rating	This issuance has not been subject to any rating request.
Tradability	Subordinated bonds of tranche D will be traded over the counter. There is no restriction imposed by the issuance conditions to the free tradability of the bonds of tranche D.
Bondholders representation	In accordance with article 299 § 1 and article 300 § 1 and 2 of law n°17-95, the Board of Directors decides - subject to the Supervisory Board's approval - to appoint Mr Mohamed HDID as temporary representative of the mass of bondholders. Being specified that the provisory agent appointed is identical for tranches A to H of the given issue, which are gathered in one single pool. This decision takes effect starting from the opening of the subscription period. The Board of Directors undertakes to proceed to the convening of the Bondholders' General Assembly to nominate the permanent representative of the bondholders within a year of the opening of the subcription period.
Applicable law	Moroccan law.
Competent Court	Commercial Court of Rabat.

Tranche E : Subordinated bonds reimbursable in fine over a period of 10 years listed on the Casablanca Stock Exchange with an annually adjustable interest rate

Nature of the securities	Subordinated bonds listed on the Casablanca Stock Exchange, dematerialized by registration with the central securities depository (Maroclear) and registered in accounts with accredited affiliates.
Legal Form	Subordinated bonds in bearer form
Maximum amount of the tranche	500,000,000 Dhs.
Maximum number of securities to be issued	5,000 subordinated bonds.
Nominal unit value	100,000 Dhs.
Maturity	10 years.
Subscription period	From 22 to 24 October 2018 included
Vesting date	November 01, 2018
Maturity date	November 01, 2028
Issue price	At par, i.e 100.000 Dhs.
Risk premium	80 bps
Nominal interest rate	<p><u>Annually adjustable.</u> For the first year, the nominal interest rate is the full 52 week rate (money market rate) determined in reference to the treasury bond secondary yield curve as published by Bank Al Maghrib on October 18, 2018,. This rate is increased by a risk premium of 80 bps. The interest rate will be published in a journal of legal announcements on October 19, 2018.</p> <p>Beyond the first year, the reference rate will be the full 52 week (monetary base) rate determined in reference to the treasury bond secondary yield curve as published by Bank Al Maghrib 5 trading days prior to the anniversary date of the coupon. The reference rate thus obtained will be increased by a risk premium of 80 bps will be communicated by CAM to the Casablanca Stock Exchange 5 trading days before the anniversary date and will be published in a legal newspaper AT the same timeframe.</p>
Calculation method	<p>In case the reference rate is not observed directly on the curve of the secondary market benchmark, the determination will be made by the method of linear interpolation using the two points limiting the full 52 weeks maturity. (Monetary base).</p> <p>This linear interpolation will be done after the conversion of the next higher 52 weeks maturity actuarial rate in equivalent monetary rates.</p> <p>The calculation formula is: $(((\text{Actuarial rate} + 1) ^ (k / \text{exact number of days} *)) - 1) \times 360 / k;$ where k: maturity of the actuarial rate immediately greater than 52 weeks. * Exact number of days: 365 or 366 days.</p>
Interest	<p>Interest will be paid annually on the anniversary of the security's vesting date November 01 of each year. Payment shall be effected that very day or on the first working day thereafter if that day is not a working day.</p> <p>Due to annually interest rate adjustment, interests will be calculated on a monetary basis i.e : [nominal unit value x nominal interest rate x (exact number of days / 360 days)].</p>
Allocation method	Allocation in proportion to demand with a priority given to tranches F and H (maturity 10 years with fixed rate), then to tranches B and D (maturity 7 years with fixed rate), then to the tranches E and G (maturity 10 years with annually adjustable rate) and finally to tranches A and C (maturity 7 years with annually adjustable rate).
Repayment of principal	CAM subordinated bonds issue will be subject to an in fine repayment of the principal.

	<p>In the event of merger, demerger or partial contribution of CAM assets during the life of the securities entailing the transmission of all assets and liabilities to a separate legal entity, all rights and obligations in respect of the subordinated bonds will be automatically transferred to the legal entity assuming CAM rights and obligations.</p> <p>In the event of CAM going into liquidation, repayment of the principal will be subordinated to all other debts.</p>
Early repayment	<p>CAM shall refrain, during the whole Term of the loan, from the early amortization of the subordinated bonds.</p> <p>CAM nevertheless, reserves the right, with the prior agreement of Bank Al Maghrib, to buy back the subordinated bonds on the secondary market, provided that the legal and regulatory provisions so allow, such repurchases being without consequence for bondholders wishing to keep their securities until normal maturity, and without affecting the schedule for normal amortization. Subordinated bonds so repurchased will be cancelled with the prior approval of Bank Al-Maghrib.</p> <p>In case of cancellation, the issuer must inform the Casablanca Stock Exchange of canceled bonds.</p>
Assimilation	<p>The subordinated bonds of Tranche E are not subject to any assimilation.</p>
Rank/subordination	<p>The capital and the interests are subject to a subordination clause.</p> <p>The application of this clause does, in no way, violate the legal norms regarding the accounting principles of losses allocation, the shareholders' obligations and the subscribers rights to get, in compliance with the contractually determined terms, the payment of their capital and interest on securities.</p> <p>In the event of the liquidation of CAM, the subordinated securities of the present issuance will be reimbursed on capital at a price equal to the par. Their reimbursement shall only occur after payment of all privileged or unsecured creditors . These subordinated bonds will have the same ranking at reimbursement as the other subordinated loans, which have been or might be issued subsequently by CAM in Morocco or abroad, in proportion of their amount, if applicable.</p>
Maintaining ranking	<p>CAM undertakes, until effective reimbursement of all the subordinated bonds of this present issuance, not to institute on any other subordinated securities, which it may issue subsequently, any priority in terms of reimbursement ranking in case of litigation, without consenting the same rights to the subordinated bonds of this issuance.</p>
Repayment guarantee	<p>This issuance is not subject to any particular guarantee.</p>
Rating	<p>This issuance has not been subject to any rating request.</p>
Tradability	<p>The subordinated bonds of tranche E are freely negotiable at the Casablanca Stock Exchange.</p> <p>There is no restriction imposed by the issuance conditions to the free nego-tiability of the bonds of tranche E.</p>
Securities listing	<p>The subordinated bonds of the tranche E will be listed on the Casablanca Stock exchange and will thus be object of a request for admission to the bonds compartment of the Casablanca Stock Exchange. Their listing date is foreseen to be on October 29, 2018 on the bonds compartment, under the ticker OCAMH.</p> <p>To be listed on the Casablanca Stock Exchange, the total amounts allotted to the tranches A, B, E and F must be higher or equal to 20,000,000 MAD. If after the closure of the subscription period, the amount allotted to tranches A, B, E and F is lower than 20,000,000 MAD, the subscriptions relating to these tranches will be cancelled.</p>
Company responsible of the registration	<p>The company responsible of the registration is MSIN</p>
Procedure of first listing	<p>The listing of tranche E will be performed by a direct listing in accordance with articles 1.2.6 and 1.2.22 of the General Regulation of the Casablanca Stock Ex-change.</p>
Bondholders representation	<p>In accordance with article 299 § 1 and article 300 § 1 and 2 of law n°17-95, the Board of Directors decides - subject to the Supervisory Board's approval - to appoint Mr Mohamed HDID as temporary representative of the mass of bondholders. Being specified that the</p>

provisory agent appointed is identical for tranches A to H of the given issue, which are gathered in one single pool. This decision takes effect starting from the opening of the subscription period. The Board of Directors undertakes to proceed to the convening of the Bondholders' General Assembly to nominate the permanent representative of the bondholders within a year of the opening of the subscription period.

Tranche G : Unlisted Subordinated bonds reimbursable in fine over a period of 10 years with an annually adjustable interest rate

Nature of securities	Subordinated bond tradable over the counter (unlisted), dematerialized by registration with the central securities depository (Maroclear) and registered in accounts with accredited affiliates.
Legal form	Subordinated bonds in bearer form.
Maximum amount of the tranche	500,000,000 Dhs.
Maximum number of securities to be issued	5,000 subordinated bonds.
Nominal unit value	100,000 Dhs.
Maturity	10 years.
Subscription period	From 22 to 24 October 2018 included
Vesting date	November 01, 2018
Maturity date	November 01, 2028
Issue price	At par, i.e 100.000 Dhs.
Risk premium	80 bps
Nominal interest rate	<p><u>Annually adjustable.</u> For the first year, the nominal interest rate is the full 52 week rate (money market rate) determined in reference to the treasury bond secondary yield curve as published by Bank Al Maghrib on October 18, 2018. This rate is increased by a risk premium of 80 bps. The interest rate will be published in a journal of legal announcements on October 19, 2018.</p> <p>Beyond the first year, the reference rate will be the full 52 week (monetary base) rate determined in reference to the treasury bond secondary yield curve as published by Bank Al Maghrib 5 trading days prior to the anniversary date of the coupon. The reference rate thus obtained will be increased by a risk premium of 80 bps will be published by CAM in a legal newspaper at the same timeframe.</p>
Calculation method	<p>In case the reference rate is not observed directly on the curve of the secondary market benchmark, the determination will be made by the method of linear interpolation using the two points limiting the full 52 weeks maturity. (Monetary base). This linear interpolation will be done after the conversion of the next higher 52 weeks maturity actuarial rate in equivalent monetary rates. The calculation formula is: $(((\text{Actuarial rate} + 1) ^ (k / \text{exact number of days} *)) - 1) \times 360 / k;$ where k: maturity of the actuarial rate immediately greater than 52 weeks. * Exact number of days: 365 or 366 days.</p>
Interest	<p>Interest will be paid annually on the anniversary of the security's vesting date November 01, of each year. Payment shall be effected that very day or on the first working day thereafter if that day is not a working day. Due to annually interest rate adjustment, interests will be calculated on a monetary basis i.e: $[\text{nominal unit value} \times \text{nominal interest rate} \times (\text{exact number of days} / 360 \text{ days})].$ </p>
Allocation method	Allocation in proportion to demand with a priority given to tranches F and H (maturity 10 years with fixed rate), then to tranches B and D (maturity 7 years with fixed rate), then to the tranches E and G (maturity 10 years with annually adjustable rate) and finally to tranches A and C (maturity 7 years with annually adjustable rate).
Repayment of principal	CAM subordinated bonds issue will be subject to an in fine repayment of the principal. In the event of merger, demerger or partial contribution of CAM assets during the life of

	<p>the securities entailing the transmission of all assets and liabilities to a separate legal entity, all rights and obligations in respect of the subordinated bonds will be automatically transferred to the legal entity assuming CAM rights and obligations.</p> <p>In the event of CAM going into liquidation, repayment of the principal will be subordinated to all other debts.</p>
Early repayment	<p>CAM shall refrain, during the whole Term of the loan, from the early amortization of the subordinated bonds.</p> <p>CAM nevertheless, reserves the right, with the prior agreement of Bank Al Maghrib, to buy back the subordinated bonds on the secondary market, provided that the legal and regulatory provisions so allow, such repurchases being without consequence for bondholders wishing to keep their securities until normal maturity, and without affecting the schedule for normal amortization. Subordinated bonds so repurchased will be cancelled with the prior approval of Bank Al-Maghrib.</p>
Assimilation	<p>The subordinated bonds of Tranche G are not subject to any assimilation.</p>
Rank/subordination	<p>The capital and the interests are subject to a subordination clause.</p> <p>The application of this clause does, in no way, violate the legal norms regarding the accounting principles of losses allocation, the shareholders' obligations and the subscribers rights to get, in compliance with the contractually determined terms, the payment of their capital and interest on securities.</p> <p>In the event of the liquidation of CAM, the subordinated securities of the present issuance will be reimbursed on capital at a price equal to the par. Their reimbursement shall only occur after payment of all privileged or unsecured creditors . These subordinated bonds will have the same ranking at reimbursement as the other subordinated loans, which have been or might be issued subsequently by CAM in Morocco or abroad, in proportion of their amount, if applicable.</p>

V. RISK FACTORS

A. Credit Risk

Credit risk is the risk of loss relative to a borrower's default in repayment of its debts.

General credit risk policy

The general credit risk policy, set up at the group level after the administrative entities approval, defines the rules organising the processes of taking, managing, monitoring and controlling credit risk. It provides a secure framework to the development of the Bank's activities in accordance with several principles:

- Respect of strategic orientations in terms of sector positioning and public service mission:
 - Maintaining the leading role in the agriculture sector ;
 - Providing an important place for financing small-scale agriculture;
 - Providing a balanced financing of the various components of the agricultural value chain (from upstream agricultural activities, pure agriculture, to downstream agricultural activities);
 - Establishment of balanced territorial strategies through the financing of agriculture in all regions of Morocco;
- Respect of the fundamental principles of management and monitoring of credit risk:
 - Securing upstream credit activities through a rigorous selection of customers and projects to finance ;
 - Risks Diversification ;
 - Rating of counterparties ;
 - Collegiality of the decision leading in the establishment of committees at all levels of the sector ;
 - Separation between the production, the assessment and the risk control functions;
 - Periodic monitoring of the commitment portfolio;
 - Early detection of risks relative to the deterioration of the counterparties quality;
 - Reactivity in the follow-up of customers in difficulty and in the recovery of outstanding debts ;
 - Sharing responsibilities for the control, measurement and supervision of credit risk between operational entities, credit risk service, internal control and governance.

The implementation of the general credit risk policy is based on:

- Organizational, governance and structured control system ;
- A risk management strategy adapted to the specificities of the Bank;
- A monitoring, assessment and controlled measurement strategy ;
- Clearly defined internal rules and procedures;

Credit Risk Strategy

The Group's current for credit risk enables it to move from a corrective approach to a preventive risk approach via a proactive and dynamic management system based on:

- A diversification strategy in terms of sectors, clients and geographical positioning, enabling it to diversify risks and systematically reduce concentration risk;
- A system of internal limits and delegations which determines the initiative margin available to operational units, in respect of the general objectives of the framework of the credit policy ;
- Loans distribution process based on a good selection of borrowers;
- Appropriate pricing and taking into account guarantees for any commitment to enhance the transaction security for the Bank;
- A continuous monitoring process in respect of the group's commitments, through the establishment of monitoring and warning indicators, so that adverse evolutions can be detected quickly and appropriate measures can be adopted ;
- A recovery process that reduces the impact of the cost of risk and improves profitability;

The Bank's risk strategy is also based on an overall credit risk management and monitoring system, which is the essential complement to a good management, in order to better understand the performances of the loan portfolio and the risk credit management policy.

Decision process

All credit applications are submitted to the competent division for decision-making based on a delegation diagram in respect of the following principles:

- Tasks separation between commercial entities and entities responsible for risk assessment, to ensure the quality of risk assessment and objectivity in decision-making;
- Collegiality of decisions through the accountability of committees of different skill levels. Skill management is done through a delegation scheme;
- Risk prevention through the analysis of credit application files by different entities ;
- Initial analysis of the files by the commercial entities who received the requests and then a second risk analysis made by the risk entities at the GGR (Global Risk Management) level according to the risk incurred.

This delegation system designating the level of authority, is expressed according to several parameters (outstanding credit for individual customers or groups, nature of the application, type of the credit, customers category, point of sale category, the sector of activity, etc. .) and ensures that the largest or riskiest commitments are handled at the highest level, ensuring the appropriate involvement of management in taking credit risk.

Risk measurement, evaluation and monitoring system

CAM has set up systems for analyzing and measuring risks adapted to the nature and volume of operations enabling it to understand different types of risks to which these operations expose them.

The monitoring of the risk management system is based on:

- Monitoring the portfolio commitment: assessing the quality of the Bank's commitments and its development (by client category or client group, nature of credit, sector of activity, and by risk class, etc.);
- Monitoring the credit production quality: measuring the quality of the Bank's approval process, and its evolution based on several fields (type of credit approval committee, network, type of credit, geographical area, economic sector risk class, etc.);
- Monitoring portfolio concentration risk: individual (client or interest group), sectoral or geographic, etc.
- Monitoring the quality of the portfolio (rate or number of delinquencies, sensitive debts, outstanding non performing loans, etc.)

The consolidated and transversal monitoring of commitments is managed by the Credit Risk Management Department, which carries out the necessary analyzes and makes available to the Bank's decision-making bodies assessment and monitoring elements of the commitments' portfolio.

Stress test simulation

Stress test simulations, an essential risk management practice, aim to quantify the potential impact of shocks on the credit portfolio and assess the Bank's resilience.

Taking into account the risk policy, two types of stress tests are carried out by the Bank:

- A stress test to assess credit portfolio vulnerability in the event of economic downturn or a deterioration in the quality of the counterparties.
- A stress test for the main forms of credit concentration risk with an analysis of their impact on earnings and equity.

The results of these stress tests are analyzed in order to (i) identify the risks of possible changes in market conditions that could have a negative impact on shareholders' equity or earnings, and to (ii) assess the ability to handle such situations.

Following the analysis of the results, several types of measures can be taken by the Bank, including:

- Adjusting internal limits;
- Reducing exposure on certain sectors or counterparties;
- Allocating additional internal capital.

Coverage

Coverage has a crucial importance in the credit risk corrective management, as it enables the Bank to recover its receivables from defaulting counterparties and thus reduce the impact on the risk cost.

The recovery mechanism is based on the following principles:

- Prioritize amicable settlement solutions rather than legal proceedings;
- Promote cost recovery;
- Involve sales representatives in preventive risk management and in receivables recovery as soon as the first signs of difficulty appear;
- First accountability of the sales point on its commitment portfolio across the entire credit chain.
- Focus on large claims and automate the recovery process for retail banking, especially for claims requiring mass processing.

The collection process is standardized by internal service notes and procedures that define the terms, and the monitoring and control structures.

Concentration risk

It is to be noted that CAM is subject to concentration risk on certain counterparties:

Number on 30/06/2018	Global amount of risks (KMAD)	Cash outflow loans (KMAD)	Letters of credit (KMAD)	Securities held in the beneficiary equity (KMAD)
4	4 050 353	3 939 149	94 078	17 126

B. Market risk

Market risk is the risk that changes in market risk factors, such as foreign exchange rates, interest rates, stock prices, mutual funds and commodities, may have an impact on GCAM's revenues or decrease the value of its portfolios.

The purpose of market risk management in GCAM is to manage and control market risk exposures in order to optimize the risk / return profile, while maintaining a market profile in accordance with the Bank's status as a leading financial institution in the agriculture and rural financing.

Trading teams use the basic concept of backing, to protect the Bank from this risk and insure balance sheet consolidation.

Market Risk Strategy:

The market risk management strategy is part of GCAM's general risk policy, which is part of a rigorous prudential supervision. The general market risk policy is approved by the Management Board and the Supervisory Board.

Market risks management is based on the following principles:

- Securing the development of market activities ;
- Compliance with BAM's prudential risk management regulations, procedures, circulars and internal notes;
- Close monitoring of the trading strategy ;
- Setting limits (clients, bank, securities portfolio, intraday transactions for its own account, etc.) ;
- Defining roles and responsibilities for identifying, measuring, monitoring and controlling market risks;
- Adopting best practices in terms of market risk management.

These guiding principles enabled the implementation of a market risk policy and are detailed by a well-organized plan.

Policies and procedures:

Market activities are driven by a global system encompassing governance, security, risk management and limits management. This system is based on a standardized documentation, an efficient IT and regular reportings.

The system is detailed through circulars and arrangements organising market activities, including :

- Procedures for all the markets activities operations;
- An operational limiting mechanism;
- Monitoring and reporting tools;
- Information on methodologies used in risk measurement and in validation of valuation models.

Consequently, governance bodies are organized in competent committees, including :

- The International and Capital Markets Committee in charge of the financing and investment strategy validation, international relations, management of credits and counterparty limits as well as management of the capital market and international activities;
- The Limits Clients Change Committee, authorized to decide on the access of customers to the Marketplace, the limits granted to each client as well as the type of transaction to be processed (spot, term, domiciled transactions, non-domiciled transactions);
- The Treasury Committee and ALM, which responds to the Bank's need for optimum cash management in the short term, and more generally for financial risk management.

Market risk Monitoring and management system:

In order to supervise the risks and monitor the various market activities, the group has set up a system organized around the following issues:

- An delegation of power system defining the application process, validating limits and authorizing overdrafts;
- The respect of functional and organizational separation of Front, Middle and Back Office tasks and entities;
- A set of tools for managing and controlling market risks;
- Enhancing of the internal control system through permanent control tools;
- Enhancing of the allocation and authorization control system.

Main limits:

In addition to the regulatory limits applicable to all market activities, including per-position limits, the group has established other internal limits for the trading and investment portfolio and for currency activities. These include the following limits:

- The maximum size limit for forward currency positions and trading and investment portfolio;
- The duration and sensitivity limits for the trading and bond portfolio;
- The short limit of exchange position.

The limits management is totally under control. Indeed, the limits are:

- Analyzed and approved by the competent committees;
- Configured on the information system that ensures the audit trail;
- Controlled via the same system which blocks any unauthorized overdraft;
- Reviewed based on customer needs and market context.

Indicator monitoring system:

Market risk is monitored on a daily basis by the Central Market Risk Department. The committee ensures through semi-annual reporting, levels of exposure, yield, market risk, compliance with regulatory requirements and compliance with limit provisions.

GCAM performs market activities' market risk stress test simulations for all sub-funds based on the methodological requirements of BAM reporting framework and also trading portfolio simulations in extreme cases taking into account the portfolio and market condition structure and the related risks:

- A periodic regulatory reporting system to the supervisor and supervisory authorities;
- An internal management reporting system, on the risk monitoring process.

Market risk control and management tools:

GCAM has adopted a market risk management and monitoring structure that includes the use of the Value at Risk (VaR) methodology and sensitivity analyzes for its entire trading and investment portfolio.

✓ **Value At Risk (VaR)**

The VaR is the maximum amount of losses (change in valuation) over a period of N days, and with a probability "p" of accuracy; implying a confidence interval of 1-p.

The method used by the Bank to calculate the VaR is the model based on historical returns. This method consists of measuring the possible evolution of the value of the portfolio by simulating changes in market conditions similar to what they have been in the past. The Bank retains a confidence interval of 99% and a time horizon of one day and a historical span of 2 years. This allows the day-to-day monitoring of the market risks taken by the Bank.

Even if VaR is a tool for financial risk management and a widely used risk indicator in investments, it has its limits. Aware of the limitations of the VaR model, GCAM uses other market risk management tools, particularly, change simulations of the yield curve and the exchange rates.

Main scenarios used :

- A rate fluctuation of +/-5bps, +/-10bps, +/-25bps and +/-50bps (overall indicators and by maturity tranche) ;
- An exchange rate fluctuation of +/-1% and 0.5% taking into account the composition of the MAD basket and the correlation between the EUR and the USD.

C. ALM risks

The assessment of the Bank's position in relation to the occurrence of interest rate and liquidity risks involves the calculation of a set of indicators based on the data and information used by the ALM managers.

The monitoring of the ALM risks consists, on the one hand, of analysing the outlook for liquidity and the short-term, medium-term and long-term interest rate position of our institution and, on the other hand, studying the reaction of the main indicators in exceptional circumstances (liquidity crisis, change in interest rates, etc.) through the stress test simulation program developed in-house.

Taking into account GCAM balance sheet specificities, ALM managers are required to find the appropriate means to enable the Bank to maintain its level of profitability and to meet its current and future financial obligations in both normal and crisis situations.

Interest rate risk management

Interest rate risk is defined as the negative impact of adverse changes in interest rates on the financial position of the institution as a result of all balance sheet and off-balance sheet transactions, excluding hedging transactions.

Rate risk monitoring is done through:

- The analysis of the change in the balance sheet structure through the distinction between fixed and variable rates;
 - The measurement of interest rate GAPS/impasses: Based on the balance sheet contractual elements timetables and on the assumptions of static disposal previously validated by the Treasury Committee and ALM for unaudited balance sheet items, the ALM managers measures the importance of the GAPS for each maturity to identify the Bank's risk profile.
 - The performance of stress tests: The ALM managers measure the impact of a parallel movement of the rates of 100 Pbs, 200 Pbs (regulatory) and 300 Pbs, on the GNP and the Regulatory Own Funds of the Bank. These impacts are then compared to the implemented internal limitations. This analysis is further elaborated by a breakdown of this impact by type of activity (commercial / financial).

At 31 December 2017, the one-year impact of an unfavourable variation of 200 Pbs on net banking income and regulatory capital was -0,4% and -1%, respectively, below the internal limits.

Liquidity risk management

Liquidity risk is the risk that the Bank will suffer a loss if it does not have the cash at the appropriate time to meet its financial obligations.

This risk may arise from the balance sheet structure due to mismatches between the actual maturities of assets and liabilities, financing requirements for future operations, customer behaviour, potential market disruption or the economic context.

At GCAM, the liquidity risk is regularly monitored by the ALM structure in direct collaboration with the different stakeholders (Trading teams; Market Risk Management; Commercial Bank; etc.).

The system in place allows the Bank to refinance its activities under the best conditions and in line with its strategic plan while respecting regulatory and internal limits governing this function.

Indeed, the preparation of the financing plan involves the dynamic estimation of future cash balances, taking into account the main forecasts for inflows and outflows generated by the commercial and financial activities of the Bank.

This exercise is performed using three scenarios which differ according to their severity levels. The assumptions used integrate mainly the business objectives and the ability of the Bank to raise funds on the capital markets.

In addition to the regulatory system, the Bank developed a set of tools (liquidity impediments, specific stress tests; concentration ratios, etc.) covering the short and medium terms and which are subject to an in-depth analysis to define, in the event of cash requirements, the appropriate hedging measures to be adopted by the ALM Treasury Committee.

Following the implementation of the short-term liquidity ratio (LCR), the Bank has introduced new actions, based on the strengthening of its liquid and realizable assets and the improvement of its balance sheet while preserving its profitability level. Thus, during 2017, the LCR of the Bank was established at a higher level than the minimum regulatory requirements.

D. Operational Risks

Risks strategy

Operational risk is defined as a disseminated risk with a very wide scope of risk, it concerns virtually all of the Bank's processes. For this reason, operational risk management is a major issue that must impact and mobilize all the Bank's actors.

The Operational Risk Management System implemented by the Bank ensures a reliable monitoring and knowledge of the operational risks incurred and the implementation of corrective measures to mitigate and manage these risks, implementation of risk mapping and the gradual introduction of risk monitoring indicators.

This system is based on the implementation of sound operational risk management practices that are:

- A clear operational risk management chart distributed to all stakeholders involved in the process;
- A strong culture of operational risk within the Bank;
- Internal reporting.
- In order to control its operational risks, GCAM has put in place an operational risk management policy which is part of the continuous improvement system:
- Collect the data on the (potential) risks and/or (proven) incidents;
- Analyse the (potential) risks and/or the (proven) incidents and assess their financial consequences;
- Warn the main managers affected by these incidents;
- Have control tools and indicators for all the stakeholders to send the data on the (potential) risks and/or (proven) incidents and to assess the exposure to operational risks;
- Take preventive and corrective actions that are necessary to reduce the impacts, the likelihood of occurrence of incidents while ensuring regular monitoring.

GCAM Policy in terms of Operational Risks

The policies and procedures for the management and monitoring of operational risks are formalised taking into account the entities involved in the monitoring and risk control evaluation process.

Given the nature of operational risks, internal regulatory provisions include a significant number of players involved in:

- Identifying and evaluating risks;
- Collecting and controlling incidents;
- Raising awareness and organising the operational risk division;

- Mapping risks as part of the audit and control activities.

Thus, the major internal circulars which govern operational risks are the following:

- The group operational risk management chart: it defines the general operational risk management policy for the Group in terms of:
 - Representative and risk assessment model (definition of concepts, description of benchmarks, description of standards);
 - Representative model of risk monitoring indicators and risk hedging mechanisms incident collection model
 - Incident collection model;
 - Description of the organization of the 'Operational Risk' division (stakeholders, roles and responsibilities, etc.)
 - Description of Operational Risk Management Procedures

Organization of the operational risk division

The organization of the operational risk division within the group revolves around:

- Central operations at the headquarters level, which is responsible for designing and managing methodological and IT tools, ensuring that an effective, comprehensive and homogeneous risk control system is in place for GCAM;
- Operational risk relays to the distribution network, subsidiaries and central operations as part of the process of collecting data on events, incidents and losses. These relays are responsible for identifying operational events, incidents and losses and inventorying them in the risk management tool. They are involved in the updating of the operational risk mapping and ensure the implementation of action plans to strengthen the risk management system.
- Operational risk correspondents (internal control or other entities) at the headquarters and network level responsible for identifying incidents and risks related to the activities, procedures and system of the controlled entities.

In terms of a general management approach, the Organization of the Operational Risk Division relies on two levels of management:

- The first level: the measurement and control of the operational risks are the responsibility of the Operational Risks entity. In particular, it is responsible for providing businesses with information on their level of operational risk so that they are informed about their decisions regarding actions to hedge these risks.
- The second level: the implementation of risk hedging actions and the detection and collection of incidents are the responsibility of the business lines and the entities responsible for control.

Primary operational risk management tools

The main methodological tools are (i) operational risk mapping (ii) and the incident collection process.

Operational risk mapping

The operational risk management system uses an approach that identifies and prioritizes risks, and then implements strategies to mitigate them. This approach includes both the prevention of potential problems (events) and the early detection of current problems (incidents).

Two approaches have been adopted by the OR function for risk identification and assessment:

- Approach based on meeting with operational staff to express their views on the risks involved in their activity by comparing them with the controls put in place (sample surveys, on-site team missions, remote control, etc.)
- Approach based on an increase in events and incidents via different sources (Network and Headquarters Continuous Monitoring, Operational Risk Relay, General Control, etc.).
- During 2015, a semi-annual update of risk mapping was performed and the achievements concerned mainly the following actions:
 - Updating the list of key processes and macro processes by linking them to identified risks;

- Review and validation of the qualitative assessment, ranking and rating of risks performed by the Bank in terms of probability of occurrence and loss incurred;
- Review and update of the action plans;
- Amending the existing operational risk mapping by the new risks;
- Updating the operational risk framework;
- Has the risk classification according to the control system installed.

Process for collecting events, incidents and losses

This process is based on two collection levels:

- The incidents are captured in real time as soon as they are detected by the Operational Relay using the dedicated form. A control of reported incidents is carried out, in real time, by the Operational Risk Managers, who verify their completeness, consistency and relevance. They find the corresponding risk situation in the risk mapping (if it exists) and can, if necessary, enrich them.
- The detection of incidents via internal control procedures via daily remote checks and / or through in situ missions to detect incident and loss events, which are reported via validation workflow to supply databases and to monitor the regularisation of the detected anomalies.

The process of reporting events, incidents and losses related to operational risk was formalized in 2014 as part of a validated procedure and shared with the network, thus making it possible to describe the different stages of the collection of an incident as well as the roles of the actors involved throughout this process. It has been declined in five stages:

- Stage 1: Identification of events, incidents and losses
- Stage 2: Data entry level
- Stage 3: Control of collected data
- Stage 4: Information and closure of the event or incident sheet
- Stage 5: Consolidation and Monitoring Report of the events, incidents and losses.

Business Continuity Plan (BCP)

The Crédit Agricole Group of Morocco has a Business Continuity Plan (BCP) to ensure, under various crises scenarios including facing extreme shocks, the maintaining, if necessary temporarily in a degraded mode, services or other important operational tasks, then a planned resumption of activities.

Thus, the BCP provides all backup solutions (organizational, logistics, technical, human and communication) to respond effectively to an unmanageable crisis and ensure the resumption of "core" activities in time, in case of unavailability of human resources, premises, IT systems or important providers.

In 2015, the project to update the BCP corpus of documents (methodological guide, job descriptions, communication plan, etc.) was finalized and several procedures are in progress.

It is important to note that no major incident occurred in 2015 forcing the Bank to activate its BCP.

E. Currency risk

Like all Banks, Crédit Agricole du Maroc faces a foreign exchange risk related to its various activities (foreign currency loans, foreign currency borrowings, forward exchange, etc.).

The Bank may experience a change in future exchange rates to its disadvantage and consequently record a reduction in its margin.

F. Counterparty risk management

In a context of profound changes in Morocco including the economic liberalization, the borders opening, the dismantling of customs duties, and the implementation of several free trade agreements, the counterparty risk could deteriorate, for the whole banking sector, and therefore lead to an increase in the litigation ratio. This trend could be emphasized by unfavorable economic conditions.

To manage the counterparty risk, the "Credit risk" entity within the GGR (entity created in 2009) has for main mission to analyze and instruct the group sales force requests to take higher risks. It also has the prerogatives of evaluating the guarantees consistency and validity, assessing the volume of activity and the economic rationale of the requested financing.

In addition, CAM is developing a rating system to evaluate all of its counterparties. This rating system is in line with the requirements of "Basel II". Thus, the internal rating approach implementation is based on minimum requirements that enable each credit institution to choose the systems and methods that are best suited to its business.

CAM has a rating system covering all client segments. It has a specific a rating system well-adapted to Moroccan SMEs. For the agricultural sector risk, Crédit Agricole du Maroc has a credit rating that enables the assessment the inherent credit risk based on the debtor's financial situation, its potential development and its business. The agricultural sector is characterized by its diversity and its high exposure to climate risks. With its expertise in this sector, CAM supports farmers in their development through specific financing and insurance products covering their risks.

Furthermore, in 2009, CAM initiated a process of subsidiarizing the public service mission, through the creation of the Ardi Foundation and the Tamwil El Fella company, which makes it possible to identify the risk associated with this sector and provide these entities with adapted coverage means.

G. Solvency risk

Solvency risk is the risk that a Bank will not be able to honor its commitments to its lenders.

H. Competition Risk

Crédit Agricole du Maroc, with its dedicated network and expertise in the sector, stands out as the agribusiness financing leader, despite the arrival of new competitors as well as the growing interest of certain players in this segment. The agricultural sector financing strategy is reflected in its commitment to the Green Morocco Plan with a first budget of 20 billion dirhams due in 2013 and a second envelope of 25 billion dirhams as of March 2014.

On this basis, Crédit Agricole has built a plan to reinforce its own funds to meet its commitment in this sector and confirm its leading position.

I. Sectorial concentration risk related to the public service mission

Being a public service provider, CAM Group public has the responsibility of boosting the rural economy in all its diversity. Therefore, the sectorial concentration risk is confined to the fact that the group finances several sectors of activities in the rural economy.

J. Risk related to the structural dependence to intermediation margins

Historically, CAM's interest margin is the main contributor to its Net Banking Income, 87% in 2017.

CAM has implemented several measures to reinforce the contribution of the intermediation margin in its net banking income and in particular the commission generated by e-banking operations related to the payment methods management. Therefore, the intermediation margin's contribution has been stable since 2014 and stands at nearly 12% (13% in 2017).
